A CONVENIENT, LOW-COST BURGLARY DETERRENT, LOST & FOUND AND INVENTORY SYSTEM

Just one payment. No monthly bills. Ongoing protection. A property identification kit with ID tags and warning signs. Plus your own property database securely stored in the cloud.

MyPropertyIDRegistry.com is a lost and found, burglary deterrent and online database all rolled into one convenient security kit. The system uses low-tech, commercial-grade ID tags just like large corporations and hospital systems. The ID tags are tied to the web in your own privacy-protected account. Because your account is accessible globally, a Good Samaritan can help reunite you with lost property, and you can immediately get serial numbers into the hands of the police in case of a theft.

MyPropertyIDRegistry.com preregisters your uniquely numbered ID tags the instant you complete your order. When your ID tags arrive in the mail, just adhere them to your valuables and the link is made for a Good Samaritan to help. The way to help catch thieves is to enter the serial numbers in your online privacy-protected database in order to aid the police in the event of a theft. Finally, post the warning signs on doors and windows.

MyPropertyIDRegistry.com takes just minutes to install. For a one-time flat fee, the system offers passive protection 24/7/365. Get into the habit of tagging and registering the serial numbers of new portable electronics every time you make a purchase. It's a simple DIY that the police have been recommending for decades. It's also a great way to teach children responsibility. Put them to work as the manager of this valuable security tool.

GREAT FOR SINGLES, FAMILIES, KIDS, COLLEGE STUDENTS AND SMALL BUSINESSES.
